## **più collection**

Design Lorenz \* Kaz . Catharina Lorenz & Steffen Kaz

### **più - around the desk**

The 5 elements of the collection più are all directly connected to the table top, which is supported by a trestle base. The three different containers, the high desk and the file holder, can be attached onto the table to keep your desk organised.

#### **• Container**

The storage containers allow to store paper, CD's and electronic equipment like CD-burners or Zip drive. The compartment can be arranged individually to give flexible storage height. The computer container, keeps the computer underneath the table. The containers come in three gap sizes: 22 mm, 40 mm and 54 mm to fit table tops from 10 - 54 mm. All containers are manufactured out of 1 mm steel and powder coated in different colours.

#### **• High desk**

The high desk serves as a standing work desk, or display and can be either placed directly on the table surface, or mounted on the wall. It is manufactured out of 2 mm steel and powder coated in different colours.

#### **• File holder**

Through flexible fixings, the file holder can store small folders and thick files. It is attached alongside the table edge and keeps everything within reach. The file holder is manufactured out of 1 mm steel and powder coated in different colours.

#### **• Trestles**

The specific geometry of the trestles leave more free space underneath the table. The trestle can be easily split in two parts and stored with minimum space requirements. They are bent out of 25 mm tube and powder coated in different colours.
